To

J.A.Baker Esq

SIR,

Dear Baker,

Thank you for your letter of the 15th on the subject of the Macaranga paper. I note your remarks about M.Hosei and M.Maingayi, and will see that the paper is corrected accordingly. M.Maingayi may be common near Geroek, but it is evidently a rare species in Malaya generally, and we are very glad to have your information about it.

As regards the drawings, if you will send them back, I think I can get them redrawn. I am sorry that I didnt keep them. ~~xx~~

Yours sincerely,

MEMORANDUM

From Agricultural Office, Butterworth

To Director, Bot. Gardens, Singapore

Date, June 16th, 1933.

Dear Holttum,

Many thanks for your letter. I am interested to hear that Henderson has identified one of my 'Hosei' types as 'Mainingayi' — I knew that he had a suspicion about this, but was not aware that he had come to a definite conclusion. If you would be good enough to alter the name in my manuscript I should be very grateful while ~~an add~~ a brief note on the species would make a valuable addition. I am surprised to hear that 'Mainingayi' is regarded as 'rare': in the neighbourhood of Gersoh ~~it was~~ and the Sj. Ring it occurred abundantly and I remember seeing several specimens of this type in your herbarium material (classified under Hosei).

I must also thank you for pointing out the stupid error in labelling the plates: the peltate form ('Mainingayi') is from the Gersoh district; the form with basal insertion (Hosei) is from Senga. I may add that I have also found 'Mainingayi' in neighbourhood of Senga though it does not occur at all frequently in that locality.

(2) Both Hosei and Mainingayi have food-bodies on the upper surface of the young stipules. I fancy that the two species are somewhat closely related.

(3) as regards the drawings I was afraid that you would find the execution inadequate for publication. They were extracted from a general note-book and were commenced without any intention of

MEMORANDUM

Date, _____, 193 .

publication. At the present time unfortunately ~~literally~~ cannot find sufficient time to prepare copies particularly as this would involve changes of scale and arrangement. I feel that this is rather a pity in so far as they would have increased the value of the paper but having no talent for draughtsmanship have always found the preparation of detailed drawings, such as these, ~~extremely~~ an extremely lengthy business. It has occurred to me that you might conceivably know of some one who would undertake to make accurate copies in which case I should be prepared to pay liberally for the work. Apart from this however, can see no alternative but to abandon their publication.

Thanking you again for the trouble you have taken in writing to me

Yours sincerely

C. A. James

Dear Baker,

Chasen has handed to me your paper on *Macaranga* to see. It is well worth polishing, but there are a few points which call for comment.

Macaranga Hosei. After Henderson returned from leave last year he identified your plant with peltate leaves as M. maingayi, a rare species only once previously collected, of which the type is at Kew. Henderson has a photograph of the type, and your specimen agrees quite well with it and with the description. I thought you knew of this. I can alter the name in the MS, and would like to insert a brief additional note on the species. There are two further points:

1. Do both *M. Hosei* and *M. Maingayi* (i.e., both the plants you named *Hosei*) have stipules with food-bodies on upper surface?

2. In your note you refer to the Gersek plant as having peltate leaves, but the plate labelled "from Gersek" is the other one, with basally inserted petiole. Which is right?

Drawings. I am sorry that I do not think these are quite good enough for publication as they stand, for the following reasons:

1. Your lines are too thin to stand the reduction in size which will be necessary in printing. For large drawings which have to be reduced rather bold lines are necessary, as their thickness is also reduced in proportion to reduction in size of the drawing.

2. The lettering which you have inserted will also not stand reduction. Such lettering (where necessary), and the

will put ~~in~~ in slightly with pencil.

3. You have not arranged your drawings very well to fill the space. The actual size of the plates as printed will be about 4 by 7½ inches. Your drawings are too wide in proportion to their length to fit the pages well, and there is a lot of waste space. The drawings would be greatly improved by re-arrangement to fit a space of the correct shape. The size doesn't matter much if the proportion of length to width is right. I think by careful re-arrangement of the drawings, and without undue crowding, you could reduce the number of plates by one.

I hope you will manage to re-draw the plates, as I think it is well worth doing.

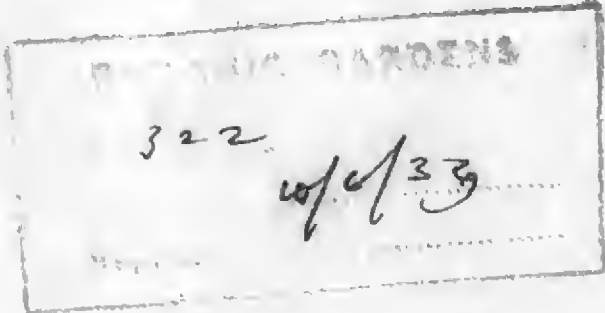

Yours sincerely,

Prov. Wellesley

Sir, Dear Baker,

Chasen has handed to me your paper
on Macaranga to see. It is well worth
publishing, but there are a few points

which call for comment.

Macaranga Hosei. After Henderson returned from leave last year
he identified your plant with peltate leaves as M. Maingayi, a rare species
only once previously collected, of which the type is at Kew. Henderson
has a photograph of the type, and your specimen agrees ~~xxxxxxx~~ quite
well with it and with description. I thought you knew of this. I can
alter the name in the MS, and would like to insert a brief additional
note on the species. There are two further points:

1. Do both M. Hosei and M. Maingayi (i.e., both the plants you named
Hosei) have ~~xxxxxxx~~ stipules with food-bodies on upper surface?
2. In your note you refer to the Gersek plant as having peltate leaves,
but the plate labelled "from Gersek" ~~xx~~ is the other one, with basally
inserted petiole. Which is right?

Drawings. I am sorry that I do not think these are quite good
enough for publication as they stand, for the following reasons:

1. Your lines are too thin to stand ^{the} reduction in size which will be
necessary in printing. For large drawings which have to be reduced,
~~rather~~ bold lines are necessary, as their thickness is also reduced
in proportion to reduction in size of the drawing.
2. The lettering which you have inserted will also not stand reduction.
~~xxxxxxx~~ Such lettering (where necessary), and the numbers of the figures, can
be inserted by the printer if you will put them in lightly with pencil.
3. You have not arranged your drawings very well to fill the space.
The actual size of the plates as printed will be about 4 by 7½ inches.
Your drawings are too wide in proportion to their length to fit the
pages well, and there is a lot of waste space. The drawings would be
greatly improved by re-arrangement to fit a space of the correct shape.

Dear Sir,

I am submitting herewith a short paper
on the Biology of *Macaranga* spp. which I had
an opportunity for studying 2 years in Johore.
I should be glad to know if you consider it
worth publishing in the J. R. A. S.

Yours faithfully

James Baker

TERNSTROEMACEAE

Adinandra coarctata, Craib in Kew Bull. 1925, 18; Flor.Siam.Enum. I, i(1925) 124.
Pattani: Betong.

Adinandra lutescens, Craib in Kew Bull. 1925, 19; Flor.Siam.Enum. I, i(1925) 125.
Pattani: Pattani, Banang Sta.

Saurauia nudiflora, DC., var. angustifolia, Craib, Flor.Siam.Enum. I, i(1925) 128.
Pattani: Bachaw.

loc. cit. *Schima crenata*, Korth., Verh.Nat.Gesch.Bot. (1839-42) 143; Craib, Flor.Siam.Enum. I, i(1925) 129.
Langkawi, Satul, Pattani.

DIPTEROCARPACEAE

Anisoptera megistocarpa, van Slooten in Bull.Jard.Bot.Buit. Ser. 3, VIII, i, 14.
Negri Sembilan, Malacca, Singapore.

Parashorea lucida (Miq.) Kurz in Journ.As.Soc.Beng. XXXIX (1870) 66; van Slooten in Bull.Jard.Bot.Buit. Ser.3, VIII, iv, 372.

ELAEOCARPACEAE

Elaeocarpus tahanensis, Hend. in Gard.Bull.S.S. V(1930) 74.
Pahang: Gunong Tahan.

TILIACEAE

Grewia disperma, Rottl. ex Spreng., Syst.II (1825) 579; Craib, Flor.Siam.Enum. I, i(1925) 183.
Pattani: Banang Sta.

MALPIGHIACEAE

Brachylophon anastomosans, Craib in Kew Bull. 1926, 157; Flor. Siam.Enum. I, ii(1926) 204.
Pattani: Banang Sta.

OXALIDACEAE

Connaropsis varians, Craib in Kew Bull. 1926, 158; Flor.Siam.Enum. I, ii(1926) 207.
Pattani: Betong.

BALSAMINACEAE

Impatiens betongensis, Craib in Kew Bull. 1926, 337; Flor.Siam. Enum. I, ii(1926) 209.
Pattani: Betong.

Impatiens opinata, Craib in Kew Bull. 1926, 163; Flor.Siam.Enum. I, ii(1926) 212.
Pattani: Banang Sta.

Impatiens tipusensis, Hend. in Gard.Bull.S.S. V (1930) 72.
Pahang: Gua Tipus.
